Summary

Annunciator like used in the Airbus planes.

[Gadgets](#) > [Video Games](#)

Tags: [airbus](#) [flightsim](#) [annunciator](#)

Inspired by my derivate of the Korry Style buttons (<https://www.printables.com/model/1641230-remix-of-airbus-style-korry-button>), i created this annunciator.

The lenses to create have the same size like for the Korrys.
How to create them can be read there.

Simply place one or two 3mm LEDs in the housing, snap it into the front plate and place the lense on top.

The snap-in-mechanism is designed for a 4mm thick front plate where the annunciator housing is recessed by 1.4mm.
